INDEX OF VOLUME 7

Abhyankar, S. *On the compositum of algebraically closed subfields*, 905.
———, S. *Two notes on formal power series*, 903.
Amitsur, S. A. *Algebras over infinite fields*, 35.
——— *Invariant submodules of simple rings*, 987.
Andree, R. V. and Petersen, G. M. *Matrix methods of summation, regular for p-adic valuations*, 250.
Arens, R. and Hoffman, K. *Algebraic extension of normed algebras*, 203.
Arsove, M. G. *Normal families of subharmonic functions*, 115.
Artzy, R. *Self-dual configurations and their Levi graphs*, 299.
Auslander, L. *On holonomy covering spaces*, 685.
Atkinson, F. V. *On polynomials with least weighted maximum*, 267.
Austin, D. G. *Some differentiation properties of Markoff transition probability functions*, 751.
Baum, J. D. *P-recurrence in topological dynamics*, 1146.
Baxter, G. *A strong limit theorem for Gaussian processes*, 522.
——— *Wiener process distributions of the "arcsine law" type*, 738.
Baxter, W. E. *Lie simplicity of a special class of associative rings*, 855.
Bell, C. B. *On the structure of algebras and homomorphisms*, 483.
Bellman, R., Glicksberg, I. and Gross, O. *Some nonclassical problems in the calculus of variations*, 87.
Bernhard, H. A. *On the infinitude of primitive k-nondeficients*, 469.
Blackett, D. W. *The near-ring of affine transformations*, 517.
——— *Simple near-rings of differentiable transformations*, 599.
Bonsall, F. F. *Extreme maximal ideals of a partially ordered vector space*, 831.
Boyd, A. V. *A Tauberian theorem for α-convergence of Cesàro means*, 59.
Boyer, D. L. *Enumeration theorems in infinite abelian groups*, 565.
Brahana, T. R. *Products of quasi-complexes*, 954.
Bremermann, H. J. *Note on plurisubharmonic and Hartogs functions*, 771.
Brunk, H. D. *On an inequality for convex functions*, 817.
Brunk, H. D., Ewing, G. M. and Utz, W. R. *Some Helly theorems for monotone functions*, 776.
Buck, R. C. *An addendum to "A note on subsequences,"* 1074.
Burgess, C. E. *A note on the separation of connected sets by finite sets*, 1115.
Burton, L. P. *Conditions which preclude the existence of critical solutions of an ordinary differential system*, 791.
Capel, C. E. and Strother, W. L. *A space of subsets having the fixed point property*, 707.
Carlitz, L. *A note on nonsingular forms in a finite field*, 27.
——— *The expansion of certain products*, 558.
——— *A note on Gauss' sum*, 910.
Chowla, S. and Mientka, W. E. *The number of lattice points in an n-dimensional tetrahedron*, 51.
Civin, P. and Yood, B. *Regular Banach algebras with a countable space of maximal regular ideals*, 1005.
Clunie, J. *The derivative of a meromorphic function*, 227.
Cockcroft, W. H. *The cohomology groups of a fibre space with fibre a space of type $K(\pi, n)$*, 1120.
Cohen, E. *The finite Goldbach problem in algebraic number fields*, 500.

Cohen, *A device for generating fields of even class number*, 595
——— H. *Fixed points in products of ordered spaces*, 703.
Cohn, P. M. *The complement of a finitely generated direct summand of an abelian group*, 520.
Cohn, R. M. *An invariant of difference field extensions*, 656.
Conte, S. D. See Royster, W. C.
Copeland, A. H., Jr. *The Pontrjagin ring for certain loop spaces*, 528.
Correl, E. and Henriksen, M. *On rings of bounded continuous functions with values in a division ring*, 194.
Cowell, W. R. *Concerning a class of permutable congruence relations on loops*, 583.
Cronin, J. *Some mappings with topological degree zero*, 1139.
Curtis, H. J. *A metrization problem concerning lattices*, 319.
Curtis, M. L. *The covering homotopy theorem*, 682.
Davison, W. F. *An equivalence relation for compact Hausdorff varieties*, 1109.
Dean, R. A. *Component subsets of the free lattice on n generators*, 220.
Derman, C. *A note on nonrecurrent random walks*, 762.
Dubois, D. W. *On partly ordered fields*, 918.
Duffin, R. J. *Exponential decay in nonlinear networks*, 1094.
Dugundji, J. and Michael, E. *On local and uniformly local topological properties*, 304.
Dvoretzky, A. *On a theorem of J. L. Walsh*, 363.
Dyer, E. *A fixed point theorem*, 662.
Edmondson, D. E. *A nonmodular compact connected topological lattice*, 1157.
Ehrenpreis, L. *On the theory of kernels of Schwartz*, 713.
——— *Sheaves and differential equations*, 1131.
Elliott, J. *On an integro-differential operator of the Cauchy type*, 616.
Evans, J. P. See Walsh, J. L.
Evans, T. *Some remarks on a paper by R. H. Bruck*, 211.
Ewing, G. M. See Brunk, H. D.
Feit, W. *On a conjecture of Frobenius*, 177.
Feldman, J. *Nonseparability of certain finite factors*, 23.
Fleming, W. H. *An example in the problem of least area*, 1063.
Ford, G. C. See Mishoe, L. I.
Fort, M. K., Jr. *Extensions of mappings into n-cubes*, 539.
Foster, A. L. *On the finiteness of free (universal) algebras*, 1011.
Fox, C. *A classification of kernels which possess integral transforms*, 401.
Freudenthal, H. *The existence of a vector of weight* 0 *in irreducible Lie groups without centre*, 175.
Fulkerson, D. R. *Note on Dilworth's decomposition theorem for partially ordered sets*, 701.
Fulks, W. *A note on the steady state solutions of the heat equation*, 766.
Fulton, C. M. *A theorem on parallels*, 1107.
Gallie, T. M., Jr. *Region of convergence of Dirichlet series with complex exponents*, 627.
Ganapathy Iyer, V. *On the space of integral functions*, IV, 644.
Gates, L. D., Jr. *Linear differential equations in distributions*, 933.
Gerstenhaber, M. *On canonical constructions*. III, 543.
Getoor, R. K. *Semi-groups of unbounded normal operators*, 387.
Glicksberg, I. See Bellman, R.
Goffman, C. and Petersen, G. M. *Consistent limitation methods*, 367.
Gorman, C. D. *A note on recurrent flows*, 142.
Gosselin, R. P. *On the convergence of Fourier series of functions in an* L^p *class*, 392.

Gottschalk, W. H. *Characterizations of almost periodic transformation groups*, 709.
Green, L. W. *Geodesic instability*, 438.
de Groot, J. *Non-Archmidean metrics in topology*, 948.
Gross, O. See Bellman, R.
Gugenheim, V. K. A. M. and Spencer, D. C. *Chain homotopy and the de Rham theory*, 144.
Haimo, D. T. *A note on convex mappings*, 423.
Hall, M., Jr. *A survey of difference sets*, 975.
——— *An identity in Jordan rings*, 990.
Harrold, O. G., Jr. *A theorem on disks*, 153.
Harrop, R. and Weston, J. D. *An intersection property in locally convex spaces*, 535.
Hartmanis, J. *Two embedding theorems for finite lattices*, 571.
Henriksen, M. *On the equivalence of the ring, lattice, and semigroup of continuous functions*, 959.
——— See Correl, E.
Herbst, R. T. *The equivalence of linear and nonlinear differential equations*, 95.
Herstein, I. N. *Conjugates in division rings*, 1021.
Herzog, F. and Piranian, G. *Some properties of the Fejér polynomials*, 379.
Hochschild, G. *Note on Lie algebra kernels in characteristic p*, 551.
Hoffman, K. See Arens, R.
Hsiang, F. C. *On a test for the convergence of Fourier series*, 1036.
Hunt, G. A. *A theorem of Élie Cartan*, 307.
Ibrahim, E. M. *On D. E. Littlewood's algebra of S-function*, 199.
Isbell, J. R. and Rubin, Herman. *Limit-preserving embeddings of partially ordered sets in directed sets*, 812.
Jacoby, R. *One-parameter transformation groups of the three-sphere*, 131.
Jakimovski, A. *Some tauberian properties of Hölder transformations*, 354.
——— *A note on Hausdorff transforms*, 803.
Johnson, G., Jr. *Collective singularities of a family of analytic functions*, 653.
Johnston, J. B. *Universal infinite partially ordered sets*, 507.
Kalman, J. A. *An identity for l-groups*, 931.
Kaplan, S. *Biorthogonality and integration*, 109.
Kazarinoff, N. D. *Asymptotic solution with respect to a parameter of a differential equation having an irregular singular point*, 62.
——— *A note on two generating functions for Legendre functions*, 230.
Klee, V. L., Jr. *A note on topological properties of normed linear spaces*, 673.
——— *Strict separation of convex sets*, 735.
Krabbe, G. L. *Abelian rings and spectra of operators on l_p*, 783.
Kramer, V. A. *Asymptotic inverse series*, 429.
Kruskal, J. B., Jr. *On the shortest spanning subtree of a graph and the traveling salesman problem*, 48.
Kyner, W. T. *A generalization of the Borsuk and Borsuk-Ulam theorems*, 1117.
Laha, R. G. *On some properties of the normal and gamma distributions*, 172.
Leach, E. B. *On a converse of the Hölder inequality*, 607.
Leavitt, W. G. *Modules over rings of words*, 188.
——— *Two word rings*, 867.
Levinson, N. *On closure problems and the zeros of the Riemann zeta function*, 838.
Livingston, A. E. and Lorch, Lee. *The zeros of certain sine-like integrals*, 813.
Lorch, L. See Livingston, A. E.
McAuley, L. F. *Paracompactness and an example due to F. B. Jones*, 1155.

McCandless, B. H. *Test spaces for dimension n*, 1126.
McCarthy, P. J. *Witt's cancellation theorem in valuation rings*, 515.
McLaughlin, J. E. *Atomic lattices with unique comparable complements*, 864.
McShane, E. J. *On Stieltjes integration*, 69.
MacNerney, J. S. *Determinants of harmonic matrices*, 1044.
Mahapatra, S. See Mohanty, R.
Mairhuber, J. C. *On Haar's theorem concerning Chebychev approximation problems having unique solutions*, 609.
Marcus, M. *On the optimum gradient method for systems of linear equations*, 77.
Martin, A. D. *A singular functional*, 1031.
Maximon, L. C. *On the representation of indefinite integrals containing Bessel functions by simple Neumann series*, 1054.
Medlin, G. W. *On limits of the real characteristic roots of matrices with real elements*, 912.
Michael E. See Dugundji, J.
Mientka, W. E. See Chowla, S.
Mirkil, H. *Differentiable functions, formal power series, and moments*, 650.
Mishoe, L. I. and Ford, G. C. *On the limit of the coefficients of the eigenfunction series associated with a certain non-self-adjoint differential system*, 260.
Mohanty, R. and Mohapatra, S. *On the absolute logarithmic summability of a Fourier series and its differentiated series*, 254.
——— *On the absolute convergence of a series associated with a Fourier series*, 1049.
Mohanty, R. and Nanda, M. *On the logarithmic mean of the derived conjugate series of a Fourier series*, 397.
Mohapatra, S. See Mohanty, R.
Montgomery, D., Samelson, H. and Yang, C. T. *Groups on E^n with $(n-2)$-dimensional orbits*, 719.
Mostert, P. S. and Shields, A. L. *On a class of semigroups on E_n*, 729.
——— *On continuous multiplications on the two-sphere*, 942.
Motzkin, T. S. and Straus, E. G. *Some combinatorial extremum problems*, 1014.
Nanda, M. See Mohanty, K.
Nehari, Z. and Singh, V. *On the conformal mapping of nearly-circular domains*, 370.
Norton, D. A. and Stein, S. K. *An integer associated with Latin squares*, 331.
——— *Cycles in algebraic systems*, 999.
O'Meara, O. T. *Witt's theorem and the isometry of lattices*, 9.
——— *Basis structure of modules*, 965.
Osserman, R. *A hyperbolic surface in 3-space*, 54.
Paige, L. J. *A class of simple Moufang loops*, 471.
Pan, T. K. *Centers of curvatures of a vector field*, 292.
——— *Torsion of a vector field*, 449.
Pernavs, N. *On a mixed boundary value problem of harmonic functions*, 127.
Petersen, G. M. See Goffman, C.
——— See Andree, R. V.
Peyerimhoff, A. *On convergence fields of Nörlund means*, 335.
Piranian, G. See Herzog, F.
Plunkett, R. L. *A fixed point theorem for continuous multi-valued transformations*, 160.
Putnam, C. R. *On commutators and Jacobi matrices*, 1026.
Ree, R. *The existence of outer automorphisms of some groups*, 962.
Ree, R. and Wisner, R. J. *A note on torsion-free nil groups*, 6.
Reich, E. *On a Bloch-Landau constant*, 75.
Reisel, R. B. *A generalization of the Wedderburn-Malcev theorem to infinite dimensional algebras*, 493.

Richardson, M. *On finite projective games*, 458.
Rinehart, R. F. *The derivative of a matric function*, 2.
Riney, T. D. *On the coefficients in asymptotic factorial expansions*, 245.
Roberts, J. B. *Note on linear forms*, 465.
Robinson, A. *Solution of a problem by Erdös-Gillman-Henriksen*, 908.
Rosen, W. G. *On invariant means over compact semigroups*, 1076.
Rosenberg, A. *The Cartan-Brauer-Hua theorem for matrix and local matrix rings*, 891.
Roth, W. E. *On the characteristic polynomial of the product of several matrices*, 578.
Royster, W. C. and Conte, S. D. *Convergence of finite difference solutions to a solution of the equation of the vibrating rod*, 742.
Rubel, L. A. *Uniqueness properties of sets with blocks*, 1023.
Rubin, H. See Isbell, J. R.
Rubin, J. E. *Remarks about a closure algebra in which closed elements are open*, 30.
Rudin, M. E. *A separable normal non-paracompact space*, 940.
Rudin, W. *Boundary values of continuous analytic functions*, 808.
